

Training

We help the Process Industry improve process / functional safety performance through hands-on training of our software, practical fundamentals and industry leading applied unit operation training courses.

Compliance Made Simple

aeShield Training

Hands On “**how to**” use aeShield software training

- ▶ ae100: aeShield Overview
- ▶ ae110: aeShield System Administration
- ▶ ae200: aeShield for SIS Designers
- ▶ ae201: aeShield C&E / Test Plan Creation
- ▶ ae300: aeFacilitator for Facilitators and Scribes
- ▶ ae401: aeShield setup of KPIs

Fundamentals Training

Introduction to Process / Functional Safety
Critical Concepts

- ▶ SIS101: Introduction to Safety Instrumented Systems
- ▶ SIS201: Advanced Safety Instrumented System Design
- ▶ FSE101: Introduction to Layer of Protection Analysis

Applied Training

Industry leading applied
“real-world”
Functional Safety Training

- ▶ FSE200: Introduction to Burner Management Systems
- ▶ FSE210: Introduction to Tank Overfill Protection
- ▶ FSE220: Introduction to Pumps Overpressure Protection
- ▶ FSE230: Introduction to LNG Safeguarding
- ▶ FSE240: Introduction to Compressor Safeguarding
- ▶ FSE300: Digital Transformation of Functional Safety for EPC Driven Capital Projects
- ▶ FSE400: Failure Rate Data Management
